SIGNALMASTER SOLARIS

Federal Signal Vama presents the new **ultra-low profile SignalMaster Solaris** directional warning light. It offers an excellent results as an emergency light, thanks to its several flash patterns **with different functions (day / night effect, fast / slow, scroll)** to satisfy all needs. Its main features are:

-  **HIGH INTENSITY.** The built-in Solaris technology onto SignalMaster directional warning light has exponentially increased light intensity compared to similar products on the market.
-  **EVERY NEED SOLUTIONS.** SignalMaster Solaris has got **4 different flash patterns** (right, left, centre-out sequences and middle-out flashing mode), and **day / night***, **slow / fast*** and **scroll function** with a non-stop effect on a CAN BUS version.
-  **ULTRA-LOW PROFILE.** Its low profile gives it less aerodynamic drag with less fuel consumption and better vehicle tire grip, for an increased security. Further more, it has an attractive design without losing any functionality and it allows easier installation in any vehicle.
-  **WATERPROOF HOUSING.** Highly prepared to fight against most adverse weather conditions, thanks to its **IP protection IPX9K.**

* Features available on analogical version with SMC5 multifunction controller.

Approvals:

With IP protection IPX9K.

All models satisfy Electromagnetic Compatibility Directive 2004/104 and UNE EN 12352 Normative about traffic control equipment, warning and safety light devices.

All-purpose directional warning light: fire, ambulance, services, police, etc.

Federal Signal Vama offers to his customers, the high performance and efficiency **Solaris** technology. Traditional light systems spread it in a random direction, LED **Solaris** Technology reflects a strong light beam where it is needed most, on a wide angle, avoiding dark spots.

- 1 Last generation LED diodes.
- 2 Parabolic reflector maximizes LED light intensity.
