

# ResQMe

[ Keychain Rescue Tool ]

The latest  
advanced safety  
technology

When innovation  
brings you **solutions...**

Made in the USA, **ResQMe** is the newest technology in personal automotive escape and rescue tools and is an offered alternative to LifeHammer that can also save a life. ResQMe is today adopted by the police, and emergency personels worldwide.

**A Gift For Life!**

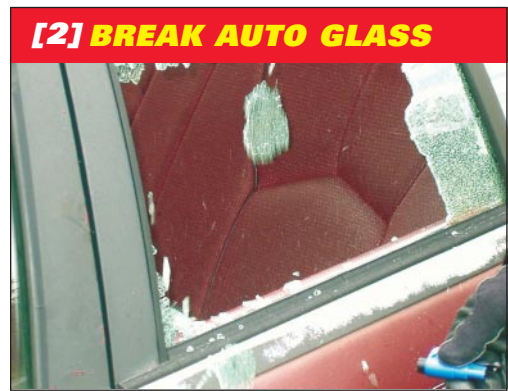

**nov8[safety]** Santa Barbara, CA 93101 - USA / 1-805-568-0227

**ResQMe** is a revolutionary hand-held rescue tool amazingly powerful despite its mini size. A **fierce but absolutely safe center-punch breaks** side windows and a carefully concealed **razor blade slices** through a jammed seat belt to prevent vehicular entrapment.

The perfect safety item, **ResQMe** serves public & private safety organizations in an innovative manner providing peace of mind and efficiency in emergency situations. It reflects commitment to the improvement of preparation and service to the community. Suitable for all markets and the general consumer. Excellent for safety organizations, retailers, car dealerships, mail order catalogs, convenience stores and fundraising programs.

*My name is Alan Reitz. I have been in the fire service for 21 years. I have been a firefighter for a large coastal California city fire department for the last 15 years.*

*We utilize the training, skills and tools provided to us, in order to survive every call. Many of the most important tools that we utilize are meant to protect us from harm.*

*Most of the tools that we use to gain access to victims of injury or illness are large and heavy. The LifeHammer and ResQMe from NOV8 [safety] are two rare examples of tools that firefighters and the general public are able to use, both on and off duty. The tools are light, dependable and so easy to use. The staff at NOV8 has always been very professional and extremely helpful. We have been using the rescue tools for many years with great success, and I would recommend them to anybody who wants to be properly prepared for an emergency.*

Sincerely,  
Firefighter Alan E. Reitz

Seatbelt cutter: hook over seatbelt and pull.

Window breaker: push this end of the tool against a side window until the concealed spring-loaded spike releases and shatters window. The spike is self-resetting and may be used many times. About 12lbs (5kg) of force needed.

Blade guard: remove to use.

**Specifications**

- Height: 7.50 cm (2.93 in.)
- Width: 3.20 cm (1.50 in.)
- Weight: 17 g (0.6 oz)

**Model numbers:**

- RQM-RB ResQMe Royal Blue
- RQM-Y ResQMe Yellow
- US patent 6,418,628
- Worldwide patent pending
